

**INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY MAY 28, 2003 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally, with 104 new fires reported yesterday. No new large fires were reported. Very high to extreme fire indices were reported in Arizona, California, Colorado, Michigan, Minnesota, New Mexico, Oklahoma, and Texas.

**ALASKA AREA LARGE FIRES:**

REX BRIDGE, State of Alaska. A Type 2 Incident Management Team (Kurth) is assigned. This fire is burning in black spruce, tundra and hardwoods thirty miles southwest of Nenana, AK. Smoldering and creeping fire behavior was observed yesterday with isolated torching. Continued dozer and handline construction actions are planned for today.

ILIAMNA, State of Alaska. A Type 2 Incident Management Team (Jandt) is assigned. This fire is burning in tundra and black spruce two miles north of Iliamna, AK. Minimal fire activity was observed yesterday with flare-ups occurring in the interior of the fire due to 10 to 20 mph winds. Resources will continue mopup and patrol actions today.

## OUTLOOK:

**Weather Discussion:** A strong high pressure ridge will produce very hot temperatures over much of the west. Dry thunderstorms are possible in portions of Arizona and western New Mexico. Thunderstorms are also possible over the Pacific Northwest as a cold front moves through the region. In the east, low humidity and gusty winds are expected in portions of Florida and northern Minnesota. In Alaska, a frontal system stretches across the northern and western sections while high pressure begins to build in the eastern interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>SOUTHERN CALIFORNIA</b> Sunny, hot, and dry.	80s-90s Mountains 90-103 Valleys 105-115 Deserts	8-15% Mountains 10-20% Valleys 5-15% Deserts	SW-NW 5-15 mph.
<b>SOUTHWEST AREA</b> Partly to mostly sunny, isolated thunderstorms along the Mogollon Rim in AZ and along the Continental Divide northward to north central NM.	Upper 60s to 80's in the mountains, and northeast NM and northwest TX. 80s and 90s remaining at the lower elevations, and 100 to 110 in the AZ deserts.	5-15% in AZ and northwest NM, 15-35% in north central NM to southeast AZ, 35-60% for the remainder of NM and west TX.	South to southeast 5-15 mph in parts of AZ, NM, and southwest TX, terrain driven winds across southwest AZ at 10-15 mph and shifting to North across northwest TX.
<b>EASTERN AREA</b> Becoming partly cloudy across northern MN, elevated fire potential is expected over this area outside of any significant rainfall which fell Tuesday and Tuesday night, a chance of thunderstorms over the eastern Great Lakes	66 to 76	25 to 35%	North to northwest wind at 15 to 25 mph over the northwest part of the Great Lakes Compact
<b>ROCKY MOUNTAIN AREA</b> Southern Colorado: Isolated to scattered thunderstorms mainly in the front range.	75-85	15%-25%	5-10 mph upslope-upvalley winds.
<b>ALASKA</b> Southern Interior Southwest Central/Eastern Interior	50s to low 60s 40s and low 50s High 60's to Low 70's	20%-30% 45%-55% 20-30%	Variable to South 5 to 10 mph East 10 to 20 mph Variable to SW 5 to 10 mph

**INITIATE ALL ACTIONS BASED ON CURRENT AND EXPECTED FIRE BEHAVIOR**

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
  - Post lookouts.
  - Check communications.
  - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
